 Mohamed Abdel-Azim bedir

 Mohamed Abdel-Azim bedir

Profile

Computer Science graduate from Ain Shams University with a strong interest in .NET backend development.

Experienced in building scalable web applications using ASP.NET Core and SQL Server, with knowledge of layered architecture, design patterns, and RESTful APIs. Passionate about writing clean code and continuously learning modern backend technologies.

Education

2020 – 2024 Cairo, Egypt	Bachelor's degree in Computer Science from the Faculty of Computer Science and information systems <i>Ain-Shams University</i>
-----------------------------	--

Internship

2024/07 – 2024/12	.NET Backend Diploma – Route Academy <i>Studied ASP.NET Core, MVC, and Web API Built scalable backend applications using layered architecture Developed an E-Commerce system with RESTful APIs Applied Repository & Service patterns Designed SQL Server databases Worked with Entity Framework Core (LINQ, Migrations, Relationships)</i>
-------------------	--

Projects

2023/08 – 2024/06	Vision Guide [Graduation Project] <i>Grade: A</i> Developed an AI-based guidance assistant for visually impaired users using computer vision techniques to improve navigation and accessibility.
2026/06 – 2026/06	Inventory Management System (IMS)  • Developed a full-stack Inventory Management System to manage products, categories, stock transactions, and inventory reports. • Implemented Role-Based Access Control (RBAC) using ASP.NET  Core Identity with Admin, Manager, and Staff roles. • Built RESTful APIs for managing products, categories, transactions, and reporting functionalities. • Designed and implemented SQL Server database schema using Entity Framework Core with proper entity relationships. • Developed stock transaction workflows for purchases and sales with inventory quantity updates. • Implemented low-stock alert functionality with automated email notifications using SMTP services. • Added CSV import/export capabilities for bulk product and transaction management. • Applied Repository Pattern and Unit of Work Pattern to improve maintainability and separation of concerns. • Generated inventory analytics and reporting features including stock valuation, sales tracking, and product performance metrics. Technologies: ASP.NET  Core MVC, ASP.NET  Core Web API, Entity Framework Core, SQL Server, ASP.NET  Core Identity, JWT, AutoMapper, Repository Pattern, Unit of Work, SMTP, CSV Processing.

2024/10 – 2024/12	E-Commerce Web Application  Developed a scalable E-Commerce backend using ASP.NET MVC and C# • Implemented layered architecture with Repository and Service patterns • Built RESTful APIs for product and user management • Designed SQL Server database schema • Created an Admin Dashboard for managing products and orders.
2026/05 – 2026/05	Blog Management System  Developed a secure Blog Management System using ASP.NET Core MVC, Entity Framework Core, and Identity. Implemented Role-Based Authentication & Authorization (Admin, Editor, Reader). Built CRUD operations for blog posts, categories, tags, and comments. Designed and consumed RESTful APIs for managing posts and comments. Integrated ASP.NET Core Identity for authentication and user management. Implemented Search & Filtering functionalities. Applied Repository Pattern, Dependency Injection, and 3-Tier Architecture. Managed relational database operations using Entity Framework Core & SQL Server. Improved application maintainability .
2026/05 – 2026/05	MovieAppMVC  <i>Developed a Movie Management Web Application using ASP.NET MVC and C#. • Implemented authentication and authorization using ASP.NET Identity • Developed CRUD operations for managing movies • Added image upload functionality for movie posters • Integrated SQL Server database using Entity Framework • Applied MVC architecture and LINQ queries • Designed responsive UI using Bootstrap • Managed source code using Git and GitHub</i>
2023/03 – 2023/05	Events Planning App <i>This application is based on organizing events and was applied by Agile Development • Databases(DBMS) • Software engineering• ASP.NET entity model • windows forms</i>
2022/04 – 2022/06	Mini Text Editor <i>This app applied Data Structures . file management. Object-Oriented Programming (OOP)</i>

Languages

- Arabic: Native speaker
- English: Intermediate

Technical Skills

Backend

ASP.NET Core
ASP.NET MVC
REST API
Entity Framework
LINQ
JWT
CQRS
Caching (Redis)

Database

SQL Server
PostgreSQL
Oracle SQL
SQLite

Frontend

Angular

Programming Languages

C#
Java
C++

Tools

Docker
Git
GitHub
Visual Studio
VS Code
Linux Basics
