PROFESSIONAL SUMMARY

Junior .NET Developer with experience building scalable, secure, and maintainable backend applications using ASP.NET Core, Web API, Entity Framework Core, SQL Server, and RESTful APIs. Skilled in Object-Oriented Programming (OOP), SOLID principles, Clean Architecture, CQRS, MediatR, Repository Pattern, Dependency Injection, Authentication, and Authorization. Experienced in developing and integrating REST APIs, designing database solutions, implementing business logic, and writing clean, testable code. Familiar with Angular for frontend development and full-stack application integration.

TECHNICAL SKILLS

Backend

- C#, ASP.NET Core, Web API, RESTful APIs, ASP.NET MVC, OOP, Entity Framework, LINQ, CQRS

Database & Caching

- SQL Server, PostgreSQL, Oracle SQL, Redis

Architecture & Concepts

- SOLID Principles, Design Patterns, MVC, 3-Tier Architecture, Onion Architecture

Authentication & Security

- ASP.NET Identity, JWT, Role-Based Authorization

Tools & Platforms

- Visual Studio, VS Code, Postman, Swagger, Git, GitHub, Docker, Linux Basics

Frontend Basics

- HTML5, CSS3, Bootstrap, TypeScript, Angular

PROJECTS

Inventory Management System (IMS)

May 2026 – Jun 2026

ASP.NET MVC, ASP.NET Core Web API, Entity Framework Core, SQL Server, ASP.NET Core Identity, JWT, AutoMapper, Repository Pattern, Unit of Work, SMTP, CSV Processing

GitHub: github.com/Mohamedbedir/IMS.MVC.Solution

- Developed a full-stack Inventory Management System to manage products, categories, stock transactions, and inventory reports.
- Implemented Role-Based Access Control using ASP.NET Core Identity with Admin, Manager, and Staff roles.
- Built RESTful APIs for managing products, categories, transactions, and reporting functionalities.
- Designed and implemented SQL Server database schema using Entity Framework Core with proper entity relationships.
- Developed stock transaction workflows for purchases and sales with inventory quantity updates.
- Implemented low-stock alert functionality with automated email notifications using SMTP services.
- Added CSV import/export capabilities for bulk product and transaction management.

Blog Management System

Apr 2026 – May 2026

ASP.NET Core MVC, Entity Framework Core, SQL Server, ASP.NET Core Identity, Repository Pattern, DI

GitHub: github.com/Mohamedbedir/BlogSystem

- Developed a secure Blog Management System using ASP.NET MVC, Entity Framework Core, Identity.
- Implemented Role-Based Authentication & Authorization (Admin, Editor, Reader).
- Built CRUD operations for blog posts, categories, tags, and comments. Designed and consumed RESTful APIs for managing posts and comments.
- Integrated ASP.NET Core Identity for authentication and user management. Implemented Search & Filtering functionalities.
- Applied Repository Pattern, Dependency Injection, and 3-Tier Architecture.
- Managed relational database operations using Entity Framework Core & SQL Server, Improved application maintainability.

MovieAppMVC

Mar 2026 – Apr 2026

ASP.NET MVC, C#, Entity Framework Core, SQL Server, ASP.NET Core Identity, Bootstrap

runASP: movieapptest.runasp.net

- Developed a Movie Management Web Application using ASP.NET MVC and C#.
- Implemented authentication and authorization using ASP.NET Identity Developed CRUD operations for managing movies.
- Added image upload functionality for movie posters, integrated SQL Server database using Entity Framework.
- Applied MVC architecture and LINQ queries, designed responsive UI using Bootstrap.
- Managed source code using Git and GitHub.

E-Commerce Web Application

Oct 2024 – Dec 2024

ASP.NET MVC, C#, Entity Framework Core, SQL Server, ASP.NET Core Identity, Repository Pattern, DI

GitHub: github.com/Mohamedbedir/E-Commerce

- Developed a scalable E-Commerce backend using ASP.NET MVC and C#.
- Implemented layered architecture with Repository and Service patterns.
- Built RESTful APIs for product and user management, Designed SQL Server database schema.
- Created an Admin Dashboard for managing products and orders.

Vision Guide [Graduation Project]

Aug 2023 – Jun 2024

Grade: A.

Developed an AI-based guidance assistant for visually impaired users using computer vision techniques to improve navigation and accessibility.

EDUCATION & TRAINING

Ain Shams University

Sep 2020 – May 2024

Bachelor's degree in Computer Science from the Faculty of Computer and Information Sciences

Major: Information Systems

.NET Backend Diploma – Route Academy

Jul 2024 – Dec 2024

- Studied ASP.NET Core, MVC and API Built scalable backend applications using layered architecture.
- Developed an E-Commerce system with RESTful APIs Applied Repository & Service patterns.
- Designed SQL Server databases Worked with Entity Framework Core (LINQ, Migrations, Relationships).

LANGUAGES

Arabic – Native speaker | English – Intermediate
